

## Weekly Meeting Team-7

### Participants:

**Primary Facilitator:** Aziz Hanna

**Minute Taker:** Geoffrey Long

**Timer Keeper:** Ashley Simpson

**Other Member:** Rishabh Tandon

**Location:** Thursday 14<sup>th</sup> November 2013, Trottier Third Floor

### Objectives:

- Discussion of GANTT chart.
  - o Are we on schedule for the final delivery?
  - o What will be the focus of the final weekend?
  - o Any comments from the group members for the work performed so far?
  - o Member should make updates to the GANTT chart, assign task to one of the group members.
- Discussion of the final implementation
  - o When will all the code for the project be completed?
  - o When will the testing for the project be completed?
  - o Is everyone happy with how this implementation is coming along?
  - o And comments on changes that could be made to make the implementation better?
  - o How is testing going for all the code?
  - o Need to ask TA about final tests! Integration and unit tests.
  - o Any group members having any difficulties that need addressing?
- Discussion of next week's objectives.
  - o Assigning the jobs to different members of the group.
  - o What are the expectations for last meeting?
  - o Are we ready for the final demonstration? How will we prepare over the weekend?
  - o Are we ready for the meeting with the TA?
  - o Testing over the weekend.
- Comments?

## Minutes:

- Start time: 5:15
- Yes we are schedule and the code should be completed by Friday November 22<sup>nd</sup>
- Testing and compiling the final submission, also going through the structure of the code and making sure it follows specifications, etc.
- Everyone is feeling a little stressed with the progress so far, need to make sure to work primarily on the project over the weekend.
- Aziz is assigned to the GANTT chart.
- Code will be functionally completed Friday November 22<sup>nd</sup>, and after that most of the focus will be on tweaking the code to follow specifications up until the final deadline.
- Testing will be done before the final demonstration, and small tests may be completed up until the deadline.
- Everyone is very happy with the implementation.
- Testing so far is okay, there needs to be more focus on testing.
- Integration testing, best way to approach? Need to ask TA.
- Everyone is basically up to date with what is required of them and no one seems to have any problems at this time.
- Aziz will be focusing on GANTT chart, graphics and integration testing, Ashley will be focusing on unit testing, JAR file, Geoff will be focusing on the final gameplay code, and Rishab will be focusing on the database and login system.
- We should have everything together by next Thursday and on Thursday night the focus will be making sure everything is in order as well as have the final meeting.
- Yes we are ready for the meeting with the TA, integration testing, unit testing.
- No one has any comments at this point.
- Meeting end: 5:45

## GANTT Chart:

Everything is according to schedule. No changes made
