Weekly Meeting Team-7

Participants:

Primary Facilitator: Geoffrey Long

Minute Taker: Ashley Simpson

Timer Keeper: Rishabh Tandon

Other Member: Aziz Hanna

Location: Thursday 14th November 2013, Trottier Third Floor

Objectives:

- Discussion of GANTT chart.
    - Are we on schedule for the second prototype
    - What will be the focus of this weekend and next weekend
    - Any comments from the group members for the work performed so far?
    - Member should make updates to the GANTT chart, assign task to one of the group members.
- Discussion of the database and login system implementation.
    - Show code so far to the team members
    - Is everyone happy with how this implementation is coming along?
    - And comments on changes that could be made to make the implementation better?
    - How is testing going so far for this portion of the code?
    - Any group members having any difficulties that need to be addressed?
- Discussion of next week's objectives.
    - Assigning the jobs to different members of the group.
    - What are the expectations for next week's meeting?
    - Are we ready for the second prototype demonstration? How will we prepare over the weekend?
    - Are we ready for the meeting with the TA?
    - Testing schedule for next week.
- Comments?

Minutes:

- Start time: 5:25
- Yes we, Rishab has pretty much finished the login system and the database, there needs to be some changes made to finish however
- Will need to focus on the statistics module over the weekend
- Focus will be integration of the database and game, and also finishing the statistics
- Aziz will be taking care of the GANTT chart this week
- No Comments from the members, everyone seems content with the progress so far
- Everyone is pleased with the code so far, and happy with how the implementation is coming along
- Rishab would like to reorganize the database related classes, everyone agrees with this and Rishab will take lead.
- Testing is going well, most testing will take place over the weekend, and all the prototype one tests will be completed tonight
- Everyone seems to be content, will need to work more efficiently from this meeting on however
- Aziz will be in charge of the GANTT and documentation, Ashley will be testing, Geoff will be focusing on integration, and Rishab will be focusing on the database and statistics
- Start integrating all the separate pieces of code and get a completed and working model together by Nov 24th before the demonstrations take place
- For the second prototype the focus will be on completing the login system and that is on schedule with only some minor fixes required
- During tomorrow's TA meeting we will show login connections
- Testing will focus on the login system and database for next week and then finally on to integration
- Comments: Login GUI is done, Geoff: Will change the int array to a Tile class array and this will have some speed tested performed on it
- End time: 5:55

GANTT Chart:

Phase 3 was split unto more specific subtasks. The rationale is to help assign tasks to the individual members more efficiently considering that the final two weeks will be the most hectic for the project. Apart from that the GANTT chart seems to be following the teams work schedule fairly closely and therefore no other changes are required at this point.
